

OptoSigma®

OptoSigma Corporation 3210 S. Croddy Way, Santa Ana, California 92704  
Tel: 949-851-5881 Fax: 949-851-5058 Website: [www.optosigma.com](http://www.optosigma.com)

## **Assembly Technician**

OptoSigma is looking to expand our assembly team. We have been in Orange County since 1995 and have been seeing our business grow even during the unfortunate events of the past year. As a US subsidiary of a large Japanese optomechanics manufacturer with an excellent reputation in the precision optics industry, stability and long-term thinking are in our corporate DNA. For qualified candidates with the aptitude and skills, Optosigma will train you to assemble a wide variety of high tech, precision components and sub-assemblies for our demanding customer base.

### **Essential Responsibilities**

- Assemble and/or troubleshoot assemblies following established manufacturing processes and procedures.
- Complete work on time with high accuracy and quality.
- Work with Engineering and Quality Assurance to ensure standards are met and product conforms to customer requirements.
- Keep a clean and well-maintained workspace.

### **Qualifications**

- Ability to perform a series of steps accurately and repetitively according to provided instructions with minimal supervision.
- Ability to accurately work with small parts.
- Excellent hand-eye coordination/manual dexterity.
- Ability to focus on the task at hand.

### **Desired Additional Skills**

- Ability to read and interpret technical drawings.
- Basic knowledge of Microsoft Office Suite for entering production data and checking email.
- Good interpersonal, written, and verbal communication skills that translate into working in a team-based environment.
- Previous work experience in technical assembly and testing a plus

## **About OptoSigma Corporation**

OptoSigma is a growing, service oriented world-class manufacturer and distributor of high-end optics, optomechanics, motorized stages, and specialized optical coatings. We offer an exciting, growth environment for energetic, self-motivated individuals where your contributions will be recognized. Our primary customers include OEMs, research institutes and universities that use our products in a multitude of fascinating applications.
